John,

This is to follow up on our conversation earlier this afternoon.

Old Post Office Clock Tower

The renovations to the Old Post Office clock tower were cosmetic, i.e. painting, and did not include any structural changes. They were paid for by GSA. The clock tower was--and will continue to be--used as a public viewing platform operated by the Park Service. Visitors will have to walk through the space leased by Trump Old Post Office LLC to enter the tower.

Since our conversation earlier today, we have learned that the clock tower will not open tomorrow because the Park Service does not have adequate personnel to staff the tower.

Press Release on Data Center Marketplace

The Data Center Optimization Initiative (DCOI) was established by OMB Directive M-16-19. It fulfills requirements set forth in the Federal Information Technology Acquisition Reform Act of 2014 (FITARA). The purpose of that law was to improve the acquisition and management of federal information technology assets.

Among other things, DCOI requires the formation of a "data center marketplace" to be run by Inter-Agency Shared Service Providers (ISSPs). A "data center" is a large group of networked computer servers typically used for the remote storage, processing, or distribution of large amounts of electronic data. All agencies use data centers to store their electronic data. The "data center marketplace" would provide a shared service to federal agencies wishing to migrate or close their current data centers. The press release at issue would designate the Department of Agriculture's National Information Technology Center as the first ISSP for the new data center marketplace.

Please let me know if you need additional information.

Thanks,
Jack
